

Enhance your clinical skills by completing a specialty Certification!

In today's competitive job market, being able to distinguish your area(s) of clinical competency may give you a real advantage in securing employment. Certification identifies for employers the skills you bring to the job. We have offered a Certification in Manual Therapy since 1981, and currently have four areas in which skilled clinical faculty are able to impart their skills to you. For seminar dates and locations, visit the University's website at www.usa.edu or call 800.241.1027!
